CERTIFICATE OF MAILING UNDER 37 C.F.R. §1.8(a)

The undersigned hereby certifies that this document is being placed in the United States mail with first-class postage attached, addressed to Commissioner for Patents, Washington, D.C. 20231, on March 07, 2003.

William R. McClellan

William R. McClellan, Reg. No. 29,409

Commissioner for Patents
Washington, D.C. 20231

Sir:

RESPONSE

This responds to the Office Action mailed September 11, 2002 in the above-identified application. For the following reasons, reconsideration and allowance of the rejected claims are respectfully requested.

Remarks

Claims 1-17 are pending in the application. No claims have been amended.

Claims 2-5 and 15 are rejected under 35 U.S.C. §112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The Examiner asserts that claims 1 and 14 recite that the alveolar opening is determined from the course of the oxygen saturation as the airway pressure is changed. The Examiner further asserts that respective dependent claims 2 and 15 recite that the saturation is held approximately equal to a reference value and the fiO_2 is changed, which is alleged to be contradictory and to require clarification.

The relationship between independent claims 1 and 14 on the one hand and dependent claims 2 and 15 on the other may be explained as follows. Independent claims 1 and 14 are based on the recognition that the oxygen saturation (SO_2) can easily be obtained non-invasively
